

## Helping you get the Care you need! OUR INSURANCE AND MEDICARE POLICES

How we help you utilize the resources you have

### *Insurance:*

As a courtesy, we will help you file your insurance for all covered visits to our office. We are considered “out of network” with insurance companies, but, when we file your first visit we can request “In-network” coverage because Brainstem Care is unique and does not follow traditional chiropractic treatment or care plans. In our office, your payment is made directly to our office and your insurance company will reimburse you for what coverage you may have.

**\*\*TIPS:** Call the number on the back of your card and ask these questions.

“What coverage do I have for out of network chiropractic care.?”

“Can I request in network coverage?”

“May I receive pre-approval?”

### *Medicare:*

Since Brainstem Care is considered a non-reimbursable service by medicare/medicaid, we help our senior patients by reducing our fees schedule. If you are on a fixed income, we can also help you budget in a payment plan so you can obtain the care you need. We have several plans for monthly payments and will be happy to find one that works best for you!

### Why are these your policies?

We are so glad you asked! Here’s the reasons:

1. We only want to work for you! Because we are not regulated by federal and third party programs you have total access to all the treatments, referrals, labs, and tests you may require. Your care is only decided by you and us. Consider it carte blanche medicine.
2. Care for a lifetime! You may be our patient for your entire lifetime if you so choose. Having the same physician for many years is one of the greatest health benefits you may ever have. Knowing your health history is invaluable to us and may very well save your life.
3. Cost. At this time, our office visits are less than most Insurance co-pays. Without the heavy regulations by the federal government, we are able to keep overhead to a minimum, allowing us to charge less.
4. Quality! When you hire us to work for you, you are getting almost 50 years of combined experience with painful, chronic, incurable, and undiagnosed conditions. There are no “time” restrictions put on us by agencies, so we can spend as much time as needed with each patient. This type of doctoring is almost extinct. Physicians who work for large organizations are required by law to only spend a few minute per case or they will not be paid. Obviously, this lowers the level of care, costing patients untold days of suffering and even their lives. You are not a number at our office... You are worth taking care of!

Please call 918-272-1888 for current pricing, scheduling, and any other questions you have.

We really are looking forward to helping you get the care you need!

All our Best,

- Drs Ray and Mary
